B85
v.18

CONTENTS OF VOLUME EIGHTEEN

NUMBER 1. *Genetics of Micro-Organisms*

Scientific Editor: W. HAYES

		PAGE
Introduction	*Sir Macfarlane Burnet*	1
Deoxyribonucleic acid	*K. Burton*	3
Ribonucleic acid and bacterial genetics	*G. L. Brown*	10
Genes and enzymes in micro-organisms	*John R. S. Fincham*	14
Regulation of bacterial metabolism	*K. W. Fisher*	19
Genetic aspects of capsule formation in the pneumococcus	*Stanley Jackson*	24
Biosynthetic aspects of capsule formation in the pneumococcus	*George T. Mills & Evelyn E. B. Smith*	27
Morphology of the bacterial nucleus	*C. F. Robinow*	31
Conjugation in *Escherichia coli*	*W. Hayes*	36
Sex factors as episomes	*P. H. A. Sneath*	41
Colicinogeny and recombination	*Sylvia M. Smith & B. A. D. Stocker*	46
Genetics of bacteriophage	*N. Symonds*	52
Lysogeny	*J. F. Whitfield*	56
The genetic basis of bacteriophage typing	*E. S. Anderson*	64
Genetics of virulence in bacteria	*T. W. Burrows*	69
Microbial genetics and chemotherapy	*D. A. Mitchison*	74
Methods of microbial genetics in an approach to human genetics	*G. Pontecorvo*	81
Notes on Contributors		85
Book Reviews		87

★

NUMBER 2. *The Adrenal Cortex*

Scientific Editor: F. T. G. PRUNTY

		PAGE
Introduction	*F. T. G. Prunty*	89
Adrenocortical steroids: synthesis of natural compounds and some analogues	*B. A. Hems*	93
Studies on the biogenesis of the adrenal steroids	*J. K. Grant*	99
Adrenal steroid production by the placenta, foetus and new-born	*R. V. Short*	106
The adrenal cortex throughout the vertebrates	*I. Chester Jones, J. G. Phillips & D. Bellamy*	110
The adrenal cortex in domestic animals	*W. E. Balfour*	114
Morphology and secretory cytology of the human adrenal cortex	*T. Symington*	117
Mechanisms of adrenocortical control	*M. Saffran*	122
Transport and metabolism of steroids	*Ivor H. Mills*	127
Physiological importance of cortisol	*John C. Beck & Eleanor E. McGarry*	134
Actions of adrenal steroids at the cellular level	*I. E. Bush*	141
Disorders of biosynthesis in man	*R. V. Brooks*	148
Recent methods for the investigation of disorders of the adrenal cortex	*Charles H. Gray*	154
Control of secretion of aldosterone	*R. Douglas Wright*	159
Biological properties of aldosterone: physiological and pathological implications	*E. J. Ross*	16
Aldosterone secretion in man	*J. N. Mills*	170
Glossary		92
Notes on Contributors		174
Book Reviews		176

NUMBER 3. *Electron Microscopy*

Scientific Editor: R. C. VALENTINE

		PAGE
Introduction	*V. E. Cosslett*	179
Functional aspects of the structure of some animal viruses	*M. A. Epstein*	183
The cancer cell	*E. H. Mercer*	187
Viruses connected with tumours and warts	*A. F. Howatson*	193
Recent studies on the fine structure of viruses by electron microscopy, using negative-staining techniques	*R. W. Horne & P. Wildy*	199
Certain aspects of testis structure and function	*D. Lacy*	205
The cytology of the ear	*I. Friedmann*	209
Specific staining methods for enzyme localization at the subcellular level	*S. J. Holt & R. M. Hicks*	214
Electron microscopy of melanocytes	*M. S. C. Birbeck*	220
The synapse: biology and morphology	*V. P. Whittaker & E. G. Gray*	223
Fine structural organization in endocrine tissues	*J. D. Lever*	229
Fibroblasts and collagen	*J. A. Chapman*	233
Cilia and flagella	*A. V. Grimstone*	238
Quantitative electron microscopy of leprosy bacilli	*R. C. Valentine*	242
The fine structure of bacteria	*Audrey M. Glauert*	245
Notes on Contributors		251

Film Review		254

INDEX TO VOLUME EIGHTEEN

Names printed in capitals are those of authors who have contributed papers. Titles of books are printed in italics.

A

ACTH, *see* Adrenocorticotropic hormone
Adenovirus, 200
Adrenal cortex: *Adrenal circulation*, 176
—— —— *Adrenal cortex*, 176
—— —— carcinoma, 149
—— —— control mechanisms, 122
—— —— defects, types, 148
—— —— disorders, investigation, 154
—— —— function, investigation of, 156
—— —— glossary of terms used in symposium, 92
—— —— hormones, estimation in blood, 154
—— —— —— estimation in urine, 155
—— —— —— *Metabolic effects of adrenal hormones*, 178
—— —— *Human adrenal cortex*, 176
—— —— hyperplasia, congenital, 149, 157
—— —— in calf, 114, 116
—— —— in domestic animals, 114
—— —— in vertebrates, 110
—— —— introduction to symposium, 89
—— —— morphology, human, 117
—— —— secretions, in vertebrates, 110
—— —— steroid hormones, secretion rate, 156
—— —— steroids, 99
—— —— —— actions at cellular level, 141
—— —— —— actions on enzymes, 143
—— —— —— biogenesis, 99
—— —— —— biosynthesis, disorders in man, 148
—— —— —— isolated from, 99
—— —— —— metabolism, 127
—— —— —— production by foetus, 107
—— —— —— production by new-born, 108
—— —— —— production by placenta, 106
—— —— —— site of formation or zoning, 119
Adrenal cortex: steroids, synthesis of natural compounds and some analogues, 93
—— —— —— transport, 127
—— —— stress reaction, 119, 122
—— —— tumours, 149
—— gland, arteries, 117
—— —— cytology, 118
—— —— microscopic appearance, 118
—— —— secretory cytology, 118
—— —— transplanted, corticosteroid secretion in, 116
—— —— vasculature, 117
—— —— veins, 118
Adrenocortical hormones, analogues, 96
Adrenocorticotropic hormone, chemistry, 122
—— —— control of release, 122
—— —— exogenous, effect on adrenal cortex, 119
—— —— hypothalamic mediator of release, 122
—— —— mode of action, 124
Aldosterone, biological properties, 164
—— biosynthesis, 103
—— extrarenal effects, 165
—— metabolism, 127
—— renal effects, 164
—— role in hypertension, 166
—— —— in human homoeostasis, 165
—— secretion, control of, 159
—— —— in disease, 172
—— —— in man, 170
—— —— measurement, 170
Amino acids, enzyme sequences, effects of mutations, 16
Androgens, adrenal, biosynthesis, 104
—— excretion in congenital adrenal hyperplasia, 151
—— metabolism, 127
ANDERSON, E. S.: The genetic basis of bacteriophage typing, 64
Ascites tumour cell, 187
Austin, C. R., *see* Williams, P. C., 178

B

Bacharach, A. L., *see* Gray, C. H., 177
Bacteria, cell division, 246
—— cell walls, 246
—— cytoplasm, granular elements, 247
—— drug resistance, 74
—— fimbriae, 246
—— fine structure, 245
—— flagella, 238, 246
—— genetic control systems, 191
—— intracytoplasmic membranous elements, 247
—— lysogenic, 56
—— metabolism, regulation of, 19
—— nuclear material, 248
—— nuclei, morphology of, 31
—— plasma membrane, 247
—— surface layer, 245
—— virulence, genetic control, 69
Bacteriophage, classification, 56
—— genetics of, 52
—— lysogenic, as episome, 41
—— typing, genetic basis, 64
BALFOUR, W. E.: Adrenal cortex in domestic animals, 114
BECK, J. C. & McGARRY, E. E.: Physiological importance of cortisol, 135
BELLAMY, D., *see* JONES, I. C., 110
Biographical notes on contributors, 85, 174, 251
BIRBECK, M. S. C.: Electron microscopy of melanocytes, 220
—— *see* Mercer, E. H., 253
Blood pressure, maintenance, role of cortisol, 136
Book reviews, 87, 176, 253

British Medical Dictionary, 87
BROOKS, R. V.: Disorders of biosynthesis in man, 148
BROWN, G. L.: Ribonucleic acid and bacterial genetics, 10
BURNET, Sir M.: Genetics of micro-organisms: introduction to symposium, 1
BURROWS, T. W.: Genetics of virulence in bacteria, 69
BURTON, K.: Deoxyribonucleic acid, 3
BUSH, I. E.: Actions of adrenal steroids at the cellular level, 141
—— *Chromatography of steroids*, 177

C

Calf, adrenal cortex in, 114, 115
Cancer cell, 187
Capsomere, 199
Carbohydrate metabolism, effect of cortisol, 134
Causey, G.: *Electron microscopy: a textbook for students of medicine and biology*, 253
Cells, control mechanisms, 191
—— division in bacteria, 246
—— growth, bacterial, control of, 22
CHAPMAN, J. A.: Fibroblasts and collagen, 233
Chemotherapy and microbial genetics, 74
Cholesterol, role in adrenocortical steroid synthesis, 101
Cholesteryl esters, 101
Chromatography of steroids, 177
Cilia, basal bodies, 239
—— development, 240
—— electron-microscopical studies, 238
—— function, 240
—— modified, 240
Clegg, H. (editor): *Medicine: a lifelong study*, 178
Clowes, R. C., *see* Hayes, W., 87
Colicinogenic factors as episomes, 41
Colicinogeny and recombination, 46
—— transfer of, genetic recombination due to, 48
Collagen, electron-microscopical studies, 233
—— fibres in endocrine tissues, 230
—— formation, 234
—— —— in vitro, 233
—— protein, biosynthesis, 234
College of General Practitioners, medical recording service, 254
Conn's syndrome, 166
Contributors, biographical notes on, 85, 174, 251
Corti, organ of, fine structure, 210
Corticosterone, metabolism, 127
Cortisol, effects on central nervous system, 138
—— metabolism, 127
—— physiological importance, 134
—— protein binding, 128
—— role in blood-pressure maintenance, 136
—— —— in carbohydrate metabolism, 134
—— —— in electrolyte and water metabolism, 135
—— —— in infection, inflammation and trauma, 137
—— —— in lipid metabolism, 135
—— —— in renal function, 136
—— —— in wound healing, 138
—— —— structure, 93
—— —— synthesis, 94
Cortisone analogues, 96, 97
—— —— synthesis from hecogenin, 95
COSSLETT, V. E.: Electron microscopy: introduction to symposium, 179
Currie, A. R., Symington, T. & Grant, J. K. (editors): *The human adrenal cortex*, 176
Cushing's syndrome, 149
Cytoplasm, bacterial, granular elements, 247

D

Dalton, A. J. & Haguenau, F.: *Tumors induced by viruses: ultrastructural studies*, 254
Danielli, J. F.: *Journal of Theoretical Biology*, vol. 1, no. 1, 88
Deoxycholic acid, cortisol synthesis from, 94
Deoxyribonucleic acid, chemical reactivity, 6
Deoxyribonucleic acid, fractionation, 5
—— —— microbial, composition, 7
—— —— molecular weights, 4
—— —— nucleotide sequences, 7
—— —— polynucleotide chains, separation and re-association, 5
—— —— replication, 5, 6
—— —— structure, 3
Desmosomes, 190
Dexamethasone, 97, 98
Dictionaries: *British Medical Dictionary*, 87
Drug resistance, microbial, 74
—— —— —— genic control, 75

E

Ear, cytology, electron-microscopical studies, 209
—— diseases, electron-microscopical studies, 212
—— inner, innervation of sensory areas, 211
—— vestibular hair cells, 210
Education, medical: *Medicine, a lifelong study*, 178
Electrolyte metabolism, effect of cortisol, 135
Electron microscopy, bacteria, 245
—— —— cancer cells, 187
—— —— cilia, 238
—— —— collagen, 233
—— —— ear, 209
—— —— *Electron microscopy: a handbook for biologists*, 253
—— —— *Electron microscopy: a textbook for students of medicine and biology*, 253
—— —— *Electron microscopy: an introduction* (film), 254
—— —— endocrine tissues, 229
—— —— enzymes, 214
—— —— fibroblasts, 233
—— —— flagella, 238, 246
—— —— introduction to symposium, 179
—— —— leprosy bacilli, 242
—— —— melanocytes, 220
—— —— synapse, 223
—— —— *Techniques for electron microscopy*, 253
—— —— testicular structure and function, 205
—— —— viruses, 183
—— —— —— studies with negative-staining techniques, 199
Endocrine cells, surface activity, 230
—— secretory substances, formation, 231
—— tissues, fine structural organization, 229
—— —— intercellular spaces, 230
Enzymes, actions of adrenocortical steroids on, 143
—— amino-acid sequences, effects of mutations, 16
—— in micro-organisms, 14
—— subcellular, specific staining methods for localization, 214
—— synthesis, genetic control, 14
—— —— quantitative control, 17
Epidermis, cytology, 189
Episomes, alternation between nuclear and cytoplasmic states, 44
—— bacterial, distribution, 41
—— chemical nature, 42
—— effects on cell, 42
—— sex factors as, 41
—— transmission, 43
Epithelium, differentiation in, 189
EPSTEIN, M. A.: Functional aspects of the structure of some animal viruses, 183
Escherichia coli, conjugation in, 36
—— —— genetic analysis, 39
—— —— mating types, 36
—— —— transmissibility of *F* and *col* agents in, 47

F

F factors as episomes, 41
Fibroblast, differentiation, 234
—— electron microscopy, 233
—— synthesizing, morphology of, 235
Fibrogenesis, 235
Film review: *Electron microscopy: an introduction*, 254
Fimbriae, 246
FINCHAM, J. R. S.: Genes and enzymes in micro-organisms, 14
FISHER, K. W.: Regulation of bacterial metabolism, 19
Flagella, basal bodies, 239
—— development, 240
—— electron-microscopical studies, 238, 246
—— function, 240
—— modified, 240
Fluocinolone, 97
9-Fluoro-steroids, 96
Foetus, adrenal steroid production by, 107
Follicle-stimulating hormone, effect on testicular structure and function, 207
FRIEDMANN, I.: Cytology of the ear, 209

G

Genes in micro-organisms, 14
—— structural, 14
Genetical Research, vol. 1–2, 88
Genetics: *Clinical aspects of genetics*, 88
—— microbial: introduction to symposium, 1
—— —— methods, in approach to human genetics, 81
—— *Microbial genetics*, 87
GLAUERT, A. M.: Fine structure of bacteria, 245
Gooder, H., *see* Meynell, G. G., 87
GRANT, J. K.: Studies on the biogenesis of the adrenal steroids, 99

Melanin synthesis, 220
Melanocytes, electron microscopy, 220
MERCER, E. H.: The cancer cell, 187
—— & Birbeck, M. S. C.: *Electron microscopy: a handbook for biologists*, 253
Metal-shadowing staining method, 183
—— salts, precipitated, use in staining, 217
β-Methasone, 97, 98
p-Methasone, 97, 98
Methylprednisolone, 97, 98
Meynell, G. G. & Gooder, H. (editors): *Microbial reaction to environment*, 87
Microbial genetics, 87
Microbial reaction to environment, 87
Micro-organisms, drug resistance, 74
—— genes and enzymes in, 14
—— genetics: introduction to symposium, 1
—— —— methods, in approach to human genetics, 81
Microscopy, electron, *see* Electron microscopy
—— preparation methods, 183
MILLS, G. T. & SMITH, E. E. B.: Biosynthetic aspects of capsule formation in the pneumococcus, 27
MILLS, I. H.: Transport and metabolism of steroids, 127
MILLS, J. N.: Aldosterone secretion in man, 170
MITCHISON, D. A.: Microbial genetics and chemotherapy, 74
Molluscum contagiosum virus, 195
Mycobacterium lepraemurium, electron microscopy, 242
—— —— length, 243
—— —— viability, 242
—— —— weight, 243

N

Negative-staining method, 183
Nerve-endings, isolation from central nervous system, 226
—— impulse, synaptic transmission, electron-microscopical studies, 223
New-born, adrenal steroid production, 108
Nucleotides in deoxyribonucleic acid, 7
Nucleus, bacterial, morphology of, 31

O

O'Connor, M., *see* Wolstenholme, G. E. W., 178
Oestrogens, adrenal, biosynthesis, 104
—— excretion in congenital adrenal hyperplasia, 151
Operon, 21
Otocyst, sensory cells, fine structure, 211

P

Papilloma virus, human, 194
—— —— mode of development in warts, 195
Pasteurella pestis, virulence, genetic control, 69
PHILLIPS, J. G., *see* JONES, I. CHESTER, 110
Pigment effector cells, 220
Pituitary, fine structural organization, 229
Placenta, adrenal steroid production, 106
Plant viruses, 201, 202
Pneumococcus, binary capsulated, 29
—— capsule formation, biosynthetic aspects, 27
—— —— —— genetic aspects, 24
—— non-capsulated, biosynthetic pathways, 29
Polyoma virus, 193
Polysaccharides, pneumococcal capsular, biosynthesis, 28
—— —— —— chemical nature, 27
PONTECORVO, G.: Methods of microbial genetics in an approach to human genetics, 81
Prednisolone, 96, 97
Prednisone, 96, 97
Progesterone, formation, 102
—— hydroxylations, 102
Protein binding of adrenal steroids, 128
—— metabolism, effects of cortisol, 135
—— synthesis, genetic aspects, 20
—— —— role of amino acids, 10
PRUNTY, F. T. G.: Adrenal cortex: introduction to symposium, 89

R

Records: Medical recording service of College of General Practitioners, 254
Reeve, E. C. R. (editor): *Genetical Research*, vol. 1–2, 88
Reissner's membrane, fine structure, 211
Ribonucleic acid, amino-acid-transfer, 12
—— —— and bacterial genetics, 10
—— —— "messenger", 11
—— —— ribosomal, 10
—— —— role in protein synthesis, 10
Ribosomes, 188
ROBINOW, C. F.: Morphology of the bacterial nucleus, 31
ROSS, E. J.: Biological properties of aldosterone; physiological and pathological implications, 164

S

SAFFRAN, M.: Mechanisms of adrenocortical control, 122
Salmonella typhi, Vi-phage specificity, 66
—— —— Vi-phage typing, 64
—— *typhimurium*, transmissibility of *col* agents in, 47
Sandler, M., *see* McGowan, G. K., 176
SHORT, R. V.: Adrenal steroid production by the placenta, foetus and new-born, 106
SMITH, E. E. B., *see* MILLS, G. T., 27
SMITH, S. M. & STOCKER, B. A. D.: Colicinogeny and recombination, 46
SNEATH, P. H. A.: Sex factors as episomes, 41
Sperm tails, structure, 239
Staining methods, for enzyme localization at subcellular level, 214
—— —— general aspects, 215
—— —— metal shadowing, 183
—— —— negative staining, 183
—— —— —— —— use in study of virus structure, 199
—— —— precipitation of metal salts, 217
Steroids, adrenal, actions at cellular level, 141
—— —— actions on enzymes, 143
—— —— biosynthesis, disorders in man, 148
—— —— metabolism, 127
—— —— production by placenta, foetus and new-born, 106
—— —— protein binding, 128
—— —— transport, 127
Steroids, adrenocortical, biogenesis, 99
—— —— synthesis, 93
—— *Chromatography of steroids*, 177
STOCKER, B. A. D., *see* SMITH, S. M., 46
Stress, adrenocortical effect, 119, 122
SYMINGTON, T.: Morphology and secretory cytology of the human adrenal cortex, 117
—— *see* Currie, A. R., 176
SYMONDS, N.: Genetics of bacteriophage, 52
Synapse, biology, 223
—— morphology, 223
—— vesicles, 224

T

Tectorial membrane of ear, fine structure, 211
Testis, boundary tissue, 208
—— effects of luteinizing hormone and follicle-stimulating hormone on structure and function, 207
—— irradiation, effects on structure and function, 206
—— oestrogen-treated, structure and function, 207
—— spermatogenic activity and relationship between germ cells and Sertoli cells, 205
—— structure and function, electron-microscopical studies, 205
Tissue preparation methods, 183, 214
—— —— —— direct fixation, 214
—— —— —— freeze-drying and freeze-substitution, 215
Triamcinolone, 97, 98
Tropocollagen, 233
Tumors induced by viruses: ultrastructural studies, 254
Tumours, cells, 187
—— differentiation in, 187
—— virus induction, 193

V

VALENTINE, R. C.: Quantitative electron microscopy of leprosy bacilli, 242
Vertebrates, adrenal cortex in, 110
Vibrio cholerae, genetic recombination in, 49
Vi-phage, host-range variation, 65
Virulence in bacteria, genetics of, 69
Viruses, animal, structure and function, 183, 184
—— —— with combined and complex symmetry arrangements, 202
—— —— with cubic symmetry, 199
—— —— with helical symmetry, 202
—— bacterial, with combined and complex symmetry arrangements, 202
—— —— with cubic symmetry, 201
—— connected with tumours and warts, 193
—— electron microscopy, 183
—— fine structure, electron-microscopy studies using negative-staining techniques, 199
—— plant, with cubic symmetry, 201
—— —— with helical symmetry, 202
—— size and structure, 201
—— suppression by bacteriophage, 59
—— with combined and complex symmetry arrangements, 202
—— with cubic symmetry, 199
—— with helical symmetry, 202
